

I listen to K-Love on 91.1 in Denver (FM translator). K-Love is one of the few family friendly stations available in our community. I value the fact that I do not need to monitor what this station broadcasts to the listening ears of my child. I also value the fact they do not have commercials. They are one of the few stations that do not run ads.

K-Love provides an important service to our community by providing music that is upbeat, encouraging and family friendly with no commercials. I know of no other stations in my area that provide this combination of service which I would rather listen to.

How many other stations promote wholesome values? Please do not let K-Love be replaced by yet another average station with commercials. K-Love is an excellent station. Do not give LPFM priority over FM translators.

Thank you,
C. Larson
